LINDDNA

EST. 2013
AARHUS, DENMARK

With a strong passion for responsible, natural materials, we design and produce in Denmark. With quality in focus, most of our designs are carefully crafted incorporating recycled leather as a fundamental component. A unique material that offers boundless design opportunities, remarkable usability, and a quality and finish, that lasts a lifetime. Whether developing products for use in private homes, hotels, restaurants, or office spaces our products offer timeless design with Nordic aesthetics and function in mind. We want to challenge the perception of timeless design while demonstrating what new and exciting things are possible within interior design. Without compromising the possibility of pushing against conventional norms, we're using a few carefully selected materials. Unnecessary elements are trimmed during the design phase, as we believe wholeheartedly in the timelessness of simplicity and responsible materials.

EST. 2013

It All Started With a Table Mat and a Curve Shape—Still Shaping Our Designs

The journey of LIND DNA started back in 2013 with the introduction of our first and eventually most famous and widely used design; the curve-shaped table mat. The idea back then was to create an innovative, decorative, and functional design for the table mat with the perfect dimensions to place a plate, glass, and cutlery. The shape is timeless in design with a contemporary feel, and with its organic form it complements all types of tables, both round and rectangular, and everything in between. Today, the curve shape is synonymous with LIND DNA and now defines the design of many of our creations, extending far beyond table mats.

THE LIND FAMILY

Carrying the Legacy of Recycling Leather Forward Through Generations

Behind LIND DNA stands the Lind family, whose passion for design and craftsmanship has shaped the brand. Since the beginning in 2013, LIND DNA has redefined home decor with the innovative use of recycled leather. It all started in Aarhus, Denmark, where they began experimenting with surplus leather from the furniture and fashion industry to develop durable and stylish home accessories. LIND DNA remains a family-run business, with Preben Lind working alongside his daughter, Mie Lind. Mie is responsible for the design process, with a strong focus on Nordic aesthetics, creating simple yet sophisticated designs that reflect the brand's minimalist roots. Preben, on the other hand, takes charge of bringing the designs to life, including construction and sourcing the right local suppliers.

LEFTOVER CORE LEATHER

Leftover pieces of core leather from furniture and shoe production are collected to be transformed into our recycled leather.

RECYCLING LEATHER

From Leftover Leather
Cuts-Offs to Curve

Our recycled leather is made from vegetable-tanned core leather leftovers from the fashion and furniture industries—for example, scraps from shoe sole production. This surplus material is granulated into tiny pieces, mixed with natural rubber, and pressed into our recycled leather. The result is a durable material that allows us to explore endless design possibilities in colours and textures.

CORE COLLECTION

In the development of the recycled leather texture Core, our aim was to 'cut to the core' and create a recycled leather quality that can tell the story of its own production. Without colour and embossed structure, the granulated core leather is easily visible in the material, and this charming detail ensures that each mat has a unique, natural flecked pattern across the surface.

CURVE CANDLE HOLDER

The Curve Candle Holders are handcrafted in Denmark from oak with a top of recycled leather in selected colours. The two parts of the candle holder are connected with hidden magnets. In the wood, a plastic insert has been placed to protect the candle holder when the candle is burning and ensure that the candle stands steadily.

CURVE CANDLE HOLDER: **WARM GREY / BULL**

Our Curve Candle Holders are available in two designs: for regular taper candles or tealights. The hidden magnet in the oak makes it possible to combine and place the candle holders in numerous different ways according to personal style and taste. Two, three or four Curve Candle Holders can be combined into one tealight candle decoration, or they can be placed separately.

PRINTING OR TYPING ERRORS

With a strong passion for responsible, natural materials, we design and produce in Denmark. With quality in focus, most of our designs are carefully crafted, incorporating recycled leather as a fundamental component. A unique material that offers boundless design opportunities, remarkable usability, and a quality and finish, that lasts a lifetime. Whether developing products for use in private homes, hotels, restaurants, or office spaces our products offer timeless design with Nordic aesthetics and function in mind. We want to challenge the perception of timeless design while demonstrating what new and exciting things are possible within interior design. Without compromising the possibility of pushing against conventional norms, we're using a few carefully selected materials. Unnecessary elements are trimmed during the design phase, as we believe wholeheartedly in the timelessness of simplicity and responsible materials.
